PEEL
Brown Leather: Peel Cold
Carbon Fiber and PERF:
Peel warm, re-press for
2 seconds

Wash inside out
with cool water,
tumble dry

"It's best to test!"

Pre-test on an inconspicuous area before applying final production. Some garments require pre-heating and treatment, *such as blotting moisture-wicking material with rubbing alcohol*, before pressing material. Dye migration may occur with low energy dyes in polyester and blend fabrics. Check for compatibility and pre-treatment suggestions with each product's instructions. The user assumes all risk and liability, whatsoever, in connection with the use of this product. Specialty Materials cannot guarantee performance for conditions not under manufacturer's control and is not responsible for issues due to third-party material qualities. Seller's and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective by manufacturer.
